- Two-year warranty (optional extended warranty).
- Camera Adaptability

If you want the best technologically advanced pair of Night Vision binoculars available, look no further. We present you with the ATN Night Scout, "Smart" binoculars. These binoculars come with a high resolution 1st gen. light intensifier tube, which provides you with a very sharp and bright image. The computerized proximity sensor, when activated, turns the unit on when in viewing position and off when not. The heavy-coated 90mm glass lenses allow for optimum clarity and distance. The best part is that if there is no light to amplify, with the help of the infra-red illuminator, you can cut through the darkness. So if not being able to see at night has made your life dark, let the Night Scout bring some light into your life.
